Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2152

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 1-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Richard Simoni Junior and Douglas Pan (UK Patent Application Number GB 2 324 627 A), hereinafter referred to as Pan.

10. Some claims will be discussed together. Those claims which are essentially the same except that they set forth the claimed invention as a method, an information storage media, or an alternative system are rejected under the same rationale applied to the described claim.

11. Pan has disclosed:

- <Claims 1, 7, 13, and 19>

An electronic message management system comprising: a digest specification device that allows a user to obtain a plurality of digests from an information stream comprising a plurality of candidate messages by allowing the user to specify a set of one or more sender-independent message-based rules for each digest, wherein each set of one or more sender-independent message-based rules specifies one or more characteristics of the candidate messages; an information selection device that monitors the information stream and selects one or more of the plurality of candidate messages in the information stream that satisfy all of the rules in at least one of the sets of sender-independent message-based rules for at least one of the plurality of digests; and an electronic message management device that determines for each of the selected candidate messages, which of the plurality of digests corresponds to the set of sender-independent message-based rules satisfied by the particular selected candidate message, and integrates each of the selected candidate

messages into their respective corresponding digests (page 33, line 1 through page, 34, line 9).

- <Claims 2, 8, and 14>

The system of claim 1, further comprising a digest management device that delivers the digest to a predetermined destination upon satisfaction of at least one of the one or more sender-independent message-based rules (figure 7 and page 33, lines 15-20).

- <Claims 3, 10, and 16>

The system of claim 1, further comprising an information sampling device that delivers the selected candidate messages to a predetermined destination based on one or more of the sender-independent message-based rules (figure 7 and page 33, lines 15-20).

- <Claim 4>

The system of claim 1, further comprising a rule management device that manages the one or more sender-independent message-based rules (page 33, line 21 through page 34, line 2 and page 16, line 12 through page 17, line 6).

- <Claims 5, 11, and 17>

The system of claim 1, wherein the one or more sender-independent message-based rules include a Boolean comparison, a statistical-based selection criteria, a fuzzy logic based selection criteria, a keyword based selection criteria, a date, a subject, a recipient, or a sender-based selection criteria (figure 13 and page 33, lines 9-12).

- <Claims 6, 12, and 18>

The system of claim 1, wherein the electronic message is at least one of an email, an electronic message from a mailing list, and a bulletin board posting (page 33, lines 9-14).

Art Unit: 2152

- <Claims 9 and 15>

The method of claim 7, further comprising determining and updating the digest based on one or more of the sender-independent message-based rules (page 33, lines 1-9 and page 1, line 13 through page 2, line 9).

- <Claims 21, 22, 23, and 20>

The electronic message management system of claim 1, wherein the electronic message management device selects one or more of the candidate messages which meet one or more supplemental selection criteria (figure 13 and page 33, lines 9-12).

Since all the limitations of the invention as set forth in claims 1-23 were disclosed by Pan, claims 1-23 are rejected.
